

Translon Symposium 2026

At the Molecular Crossroads

29-30 June 2026 | University of Oslo, Department of Biosciences | Kristine Bonnevis hus, Oslo, Norway

Monday, 29 June

8:30 - 9:00	Registration
9:00 - 9:15	Welcome and opening remarks
9:15 - 12:30	Session 1: Regulation & Architecture Chair: Eivind Valen
9:15 - 10:00	Keynote Lecture: Pavel Baranov Enigmatic Translons - Animalcules of Molecular Biology?
10:00 - 10:30	Beáta Grallert From Stress Responses to Translation Regulation: Notes from the Outskirts
10:30 - 11:00	Coffee break
11:00 - 11:30	Martina Yordanova An evolutionary conserved translon mediates start site selection in BAG1 mRNA.
11:30 - 11:50	Maria Božko Novel +1 frameshift signals and context-dependent enhancers in yeast
11:50 - 12:10	Joanna Kufel Non-canonical translation events in the yeast <i>Saccharomyces cerevisiae</i>
12:10 - 12:30	Joanna Krupka Systematic base-editing screen of translon start codons in human tissues
12:30 - 14:15	Lunch break
14:15 - 17:30	Session 2: Ribosome & Outputs Chair: Pavel Baranov
14:15 - 15:00	Keynote Lecture: Tomasz Włodarski Co-translational protein folding in the light of ribosome evolution
15:00 - 15:30	Virtual talk: Thomas Birkballe Hansen AAV-based gene therapy using protein-coding circRNA
15:30 - 16:00	Coffee break
16:00 - 16:30	Wiktoria Orzeł Uncovering a cellular mechanism that enhances mRNA vaccines
16:30 - 16:50	Evdokiia Potolitsyna Cellular energy levels tune nucleolar phase separation to regulate ribosome biogenesis
16:50 - 17:10	Michał Marcinkowski Isoforms of mitochondrially-localized Lsm proteins affect the respiratory capacity of <i>Saccharomyces cerevisiae</i> cells
18:00	Dinner at Barcode Street Food

Translon Symposium 2026

Programme

Tuesday, 30 June

9:00 - 9:15 Welcome and opening remarks

9:15 - 12:30 **Session 3: Annotation & Resources**
Chair: Rein Aasland

9:15 - 10:00 **Keynote Lecture: Jon Mudge**
Peptideins and the hidden coding landscape of the 5' UTR

10:00 - 10:30 Jack Tierney
Representing Translation Within Genome Annotation

10:30 - 11:00 **Coffee break**

11:00 - 11:15 Kyle Meiklejohn
Representing the Dynamics of Translation with Dynamic RDGs

11:15 - 11:30 Harsh Chhajer
Recovering Hidden Translation Signals from Noisy Ribosome Profiling Data

11:45 - 12:00 Ieva Rauluseviciute
JASPAR and UniBind: open-access resources for transcription factor binding profiles and genome-wide TF-DNA interaction annotations

12:00 - 12:15 Kornel Labun
Practical tools for genome engineering with CRISPR

12:15 - 12:45 Roundtable discussion and closing remarks

12:45 - 13:30 **Lunch break**

After lunch **Walk in Vigelandsparken with international guests**
